

Photography & Profile Image Specifications

We recommend initially sending 2 - 3 high-quality professional photos to provide our design team options for promotional graphics and materials. Photos should be taken with a vertical orientation to fit mock-ups and graphics. A high-quality professional camera is highly recommended.

Photos are preferred with no cropping – hands, head, hair, shoulders, etc., should all be within the framing. Cropping can be done by our design team if needed. Vertical format photos are recommended.

Please use a well-lit area and background for your images. Busy backgrounds can be distracting.

Please NO images pulled from social media accounts or online sources such as Google or personal/company websites. These images are low-resolution and low-quality and are strictly for online media use.

All images sent should be released for use by ShoutOut to use with no possible copyright infringement or conflicts arising from using any sent images. Each personality is responsible for ensuring that any photos sent to ShoutOut can be used in promotional materials.

Please do not include text or logos in the images.

*Additional photos may be requested for upcoming sales, promotions, holidays, or ads.
